OBJECTIVE

Create, discover, study, and explore different types of Web Technologies. Provide solutions with common errors in programming. Develop systems that would help a company progress and become more successful.

EDUCATION

Computer Information Technology | Brigham Young University-Idaho
January 2016 – July 2021

Bachelor's in Computer Information Technology

EXPERIENCE

Web Developer | Incline Marketing
January 2021 – July 2021

I specialize in creating websites that provide an exceptional user experience for both desktop and mobile users. I achieved this by utilizing valid techniques such as HTML, CSS, and PHP. Additionally, I offer custom CSS solutions that not only keep up with modern web trends but also meet the unique needs of each client. My goal is to create visually appealing and functional websites that exceed expectations.

Web Developer | Yoder Smokers | Source HDD | Delano Distributors | Straightline HDD
March 2022 – April 2023

Developed web UI experiences using HTML, CSS, and JavaScript that are both desktop and mobile responsive. Additionally, I have implemented automation to streamline workflows and enhance productivity. Furthermore, I have designed and developed email templates to improve communication with clients and colleagues. My expertise in web development has allowed me to create visually appealing and user-friendly interfaces that are optimized for various devices.

SKILLS/ACTIVITIES

Passionate about Web Development by providing solutions to the constantly changing Technologies. Experienced in HTML, CSS, SASS, JavaScript, App Script, PHP, MySQL. Developed websites using Content Management systems like WordPress, Joomla, CodeIgniter, GitHub Pages and Static websites made from scratch. I enjoy learning and applying automation techniques that can be implemented in workflows for consistency and progression for any project. In my free time, I enjoy watching sports, playing Frisbee golf, and doing card tricks.
